Make A Bold Move

Shape your future in steel

Steel is a growing industry.

Steel is everywhere. It's in the cars we drive. It's in the buildings where we live and work. It's in the appliances, tools and equipment we use every day.

Today's steel industry is growing, exciting and globally competitive. It is strong, stable and sustainable. And we're looking for young people like you who are ready to help us build the future.

Build a solid career foundation.

To meet the increasing demand for our product worldwide, steel companies have gone high-tech. As a result, today's steelworkers must be technologically advanced and well trained. The Steelworker for the Future program is the perfect way to get started on a career in steel.

If you're interested in a field that can offer you many exciting and lucrative career opportunities, read on. Today's steel industry could be just what you're looking for.

CRAFT TRAINING CERTIFICATION PROGRAM

Program of Study: Maintenance Technician Mechanical/Electrical

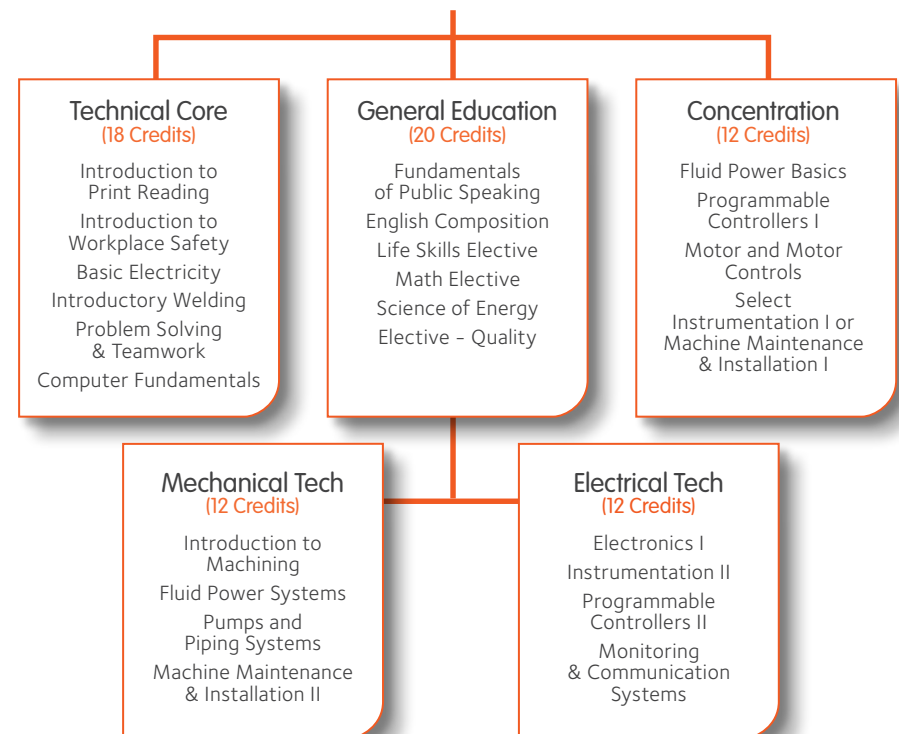

The training program pays for itself.

Ready to make your move? The Steelworker for the Future craft training program empowers you in two ways: It pays you to earn a quality degree, and it makes you employable upon graduation.

This 2½-year program includes 4 semesters of classroom training, plus 24 weeks of on-site training. During the on-site portion of the program, you'll apply what you learn in class and earn credit toward your degree. Plus you'll earn enough in wages to pay for your tuition.

As a graduate of the Steelworker for the Future program, you'll receive an Associate of Applied Science degree as either a mechanical or an electrical technician. But more importantly, you'll have the tools you need to shape your own future.

Associate of Applied Science, or Equivalent Maintenance Concentration Core Courses

ArcelorMittal wants you.

As the world's largest steel company, ArcelorMittal is proud to be leading the Steelworker for the Future program. With approximately 320,000 employees in more than 60 countries worldwide, we're the leader in all major global markets, including appliances, automotive, construction and packaging. We're constantly growing and seeking qualified candidates.

Our success is due in large part to our core values: Sustainability, Quality and Leadership. These are the building blocks of our brand promise, "Transforming Tomorrow." It's our commitment to setting globally recognized standards with the needs of future generations in mind.

At ArcelorMittal, we encourage our employees to be innovators and leaders. We also place great emphasis on personal development.

So if you don't want to grind away at a routine, we offer competitive wages and benefits packages. We also provide a stimulating, multicultural work environment, where you're exposed to continuous learning and growth opportunities. In short, ArcelorMittal wants you to be a part of "Transforming Tomorrow."

Sustainability

Our commitment to the world around us extends beyond the bottom line. We invest in people, support communities and strive to protect the environment in which we operate.

Quality

Quality outcomes depend on quality people. That is why we seek to attract and nurture the best people to deliver superior solutions to our customers.

Leadership

We are an entrepreneurial company. Our entrepreneurial spirit brought us to the forefront of the steel industry. It is now taking us beyond what the world expects of steel.

Transform
your tomorrow.
